## ABOUT US

Purozo is more than a supplier; we are a catalyst for change in the cleaning industry. Founded with a passion for sustainability and health, we're pioneers who specialise in providing eco-friendly cleaning solutions that don't compromise on effectiveness or affordability. We are powered by a fantastic team who individually tailor cleaning solutions for every customer, within their existing budget. Our journey is fuelled by the belief that every business can contribute to a greener, healthier world. We're here to guide, support, and empower our customers, helping them transition to sustainable cleaning practices with ease and confidence.

**purozo**  
SUSTAINABLE INNOVATIONS

## OUR STORY

Our story at Purozo began with a simple realisation – the cleaning industry needed sustainable change. Recognising this need, we set out to find a better way to do things differently. We built our business with a determination to reduce the reliance on damaging chemicals and excessive waste from commercial cleaning practices. In doing so, we aimed to prevent harmful substances from entering our waterways and seas, where they damage wildlife and ecosystems.

Our journey led us to seek out the very best innovative, sustainable solutions that protect health and the environment—at costs that make sense. Each product we offer is carefully selected for its gentle yet highly effective properties, ensuring our customers enjoy the best of both worlds.

Our commitment to sustainability and innovation is matched by our dedication to

customer service. We understand that making the leap from traditional cleaning products to genuinely “going green” can seem daunting, especially for those who have relied on the same practices for decades. From the start, we knew we didn't want to be just another faceless e-business. To make a real difference, we had to provide genuine, personal service—people who will talk to you on the phone and visit you in person. And that's exactly what we do.

Our customers tell us this has made us a trusted partner, providing not only brilliant cleaning solutions but also helping them achieve their sustainability goals.

We take great pride in our customers' successes— Helping to remove harmful chemicals and plastic from our ecosystem every year. This, along with knowing we're creating healthier more efficient environments for people to live and work in.

## SUSTAINABLE SUPPLY CHAIN

We're meticulous about who we partner with, choosing only those who share our deep commitment to the planet and human health. Our supply chain is transparent and principled, ensuring that every product we offer meets the highest standards of sustainability and can be fully traced.

Each supplier is carefully selected to minimise climate impact through lower emissions, reduce or eliminate single-use plastics of concern, and avoid harsh, unnecessary chemicals wherever possible.

## THE POD IN A POUCH

Pod in a Pouch is our fully UK-made range of water-soluble sachets, crafted from paper cellulose, designed to revolutionise the use of commercial cleaning products. By eliminating the need for plastic disposal or recycling and reducing water transportation, this solution offers a simple, sustainable, and highly effective alternative.

Thanks to the innovative use of paper cellulose, Pod in a Pouch surpasses traditional PVOH films, dissolving faster in both warm and cold water.

## tersano® ON DEMAND SYSTEMS

ecovadis

veritree

**The Tersano Lotus® Pro is an on-demand system that creates Stabilized Aqueous Ozone for cleaning and sanitising at the push of a button.**

Wanting to make cleaning more sustainable in your facility? Then look no further than the Tersano Lotus Pro, enabling you to reduce a vast amount of plastic and chemical waste whilst improving efficiency and operational costs.

- Environmentally sustainable
- Save on previous cleaning costs
- Safe and harmless to people
- Easy to use

### TERSANO'S IMPACT

#### Reduced Carbon Emissions

Tersano is committed to helping businesses reduce carbon emissions through our

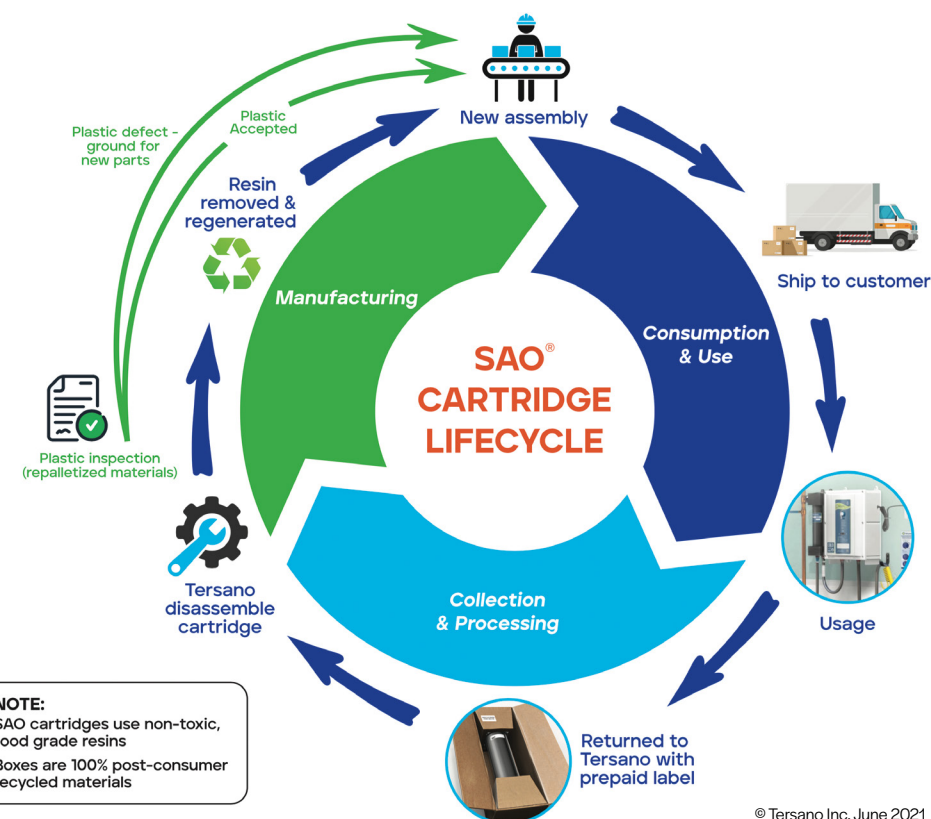

procurement and supply chain strategies that prioritize fuel efficiency. Our patented SAO solution is non-toxic, does not contribute to air or water pollution, and reverts to water and oxygen after use, ensuring no environmental harm.

#### Reduced Water Usage

Tersano's SAO is a no-rinse solution. Compared to traditional cleaning products, SAO helps businesses and individuals use less water

#### Reforestation

When you clean with Tersano, you do more than prevent environmental harm—you take actionable steps against climate change by contributing to the reforestation of our planet.

# ON DEMAND SYSTEMS

## Tersano Lotus Pro Dispensing Unit V9

LQFC275-FB

The Lotus® PRO SAO Dispenser is a simple, sustainable solution for cleaning, sanitising, and deodorising everyday surfaces. This wall-mounted device generates Stabilized Aqueous Ozone (SAO®) on-demand using just cold tap water and oxygen. SAO works by oxidising organic matter, making it a powerful cleaner that exceeds Green Seal Standards (GS-37 and GS-53).

**\*NEW\*** The new IoT system collects and reports data in real time to help:

- Track sustainability
- Monitor Usage
- Get Support
- Manage inventory
- View remotely
- Optimise workflow

The Lotus Pro's cartridge system stabilizes SAO (Stabilized Aqueous Ozone) by filtering out impurities and splitting oxygen molecules (O<sub>2</sub> to O<sub>3</sub>) using electricity. This process extends the ozone's cleaning and sanitising effectiveness, enabling powerful, toxin free cleaning for a longer period.

### Tersano SAO-24 Hour Stabiliser

LCA118K-FBINT

3,000 Litres

The SAO 24 cartridge will dispense 3,000 litres of SAO which remains effective for up to 24 hours of sanitising time and 3 days of cleaning time.

### Tersano SAO-4 Hour Stabiliser

LCA114K-FBINT

6,000 Litres

The SAO 4 cartridge will dispense 6,000 litres of SAO which remains effective for up to 4 hours of sanitising time and 3 days of cleaning time.

KLEENLY

PROBIOTICS

Probiotic cleaners use the power of beneficial bacteria to break down dirt, neutralise germs, and prevent the spread of viruses and infections.

#### How They Work:

These cleaners contain bacteria in spore form that activate when applied to surfaces, producing enzymes that break down dirt and grime. The bacteria then outcompete harmful pathogens, helping to maintain a cleaner, safer environment.

#### Key Benefits:

- Long-lasting cleaning effects, including odour control and deep surface cleaning
- Continuous cleaning action that helps prevent future build-up

#### Ingredients:

Probiotic cleaners are made from a blend of beneficial bacteria, plant-based essential oils, and water for a natural, eco-friendly clean.

#### Sustainability:

By promoting a natural cleaning cycle, probiotic cleaners offer a sustainable, eco-conscious approach to hygiene, reducing the need for harsh chemicals and providing ongoing surface maintenance.

## SPECIALIST

ABS exist to sustainably alleviate global pollution by replacing toxic chemicals and harmful practices with scientifically proven, powerful, cost effective and environmentally friendly alternatives.

### The Benefits

Naturally occurring processes undertaken by bacterial microbiota can be extremely beneficial when implemented to solve human-influenced

problems, and that is what the work of ABS is all about.

The health of any internal and external microbiotic ecosystem is intimately linked, and our use of toxic chemicals favours pathogens that deliver detrimental impact on our own health. Conversely, the use of natural microbiotic solutions within our day-do-day lives can help to detoxify our planetary environment.

### URIZAP Urinal Digester & Odour Remover

#### URIZAP1

1kg

URIZAP is a patented, world-first microbial formulation that eliminates urinal blockages and foul odours, with regular use preventing recurrence.

Suitable for all types of urinals, URIZAP digests built-up uric acid without the need for harsh chemicals.

One scoop a week, with one cup of water, is all takes to maintain free-flowing urinals!

### SCALEZAP

#### ABS.SCALZAP
