## GRIDDLE & HOTPLATE CLEANER INFORMATION SHEET

### USE:

Powerful grill cleaner for hot ovens, food presses, griddles, hot plates etc. Quickly removes baked on carbon and grease whilst the griddle is still hot, to eliminate downtime. This product is food safe, ready to use and doesn't require rinsing. Does not contain caustic soda found in other oven cleaners.

### DIRECTIONS:

Heat the oven/griddle to 150 C to 200 C. Turn off the oven/griddle when at the required temperature. Scrape off any burnt on solids and apply 25-50ml of product and spread a thin coating over the surface whilst the oven is still hot. Allow at least 1 minute before scrubbing the surface. Wipe the surface clean. NOTE: Wear chemical resistant gloves to avoid skin contact with the product. DO NOT apply cold water to the hot surface as this can produce steam which can scold; rapid cooling can also damage hot equipment. DO NOT USE ON ALUMINIUM.

### TECHNICAL:

|                  |                   |
|------------------|-------------------|
| Physical state:  | Liquid            |
| Colour:          | Colourless        |
| Odour:           | odourless         |
| Odour threshold: | No data available |
| pH:              | > 11.5            |
| Density:         | 1.25 – 1.3        |
